Usability Test Wireframe 2

Sandwico development team

July 2019

1 Introduction

This document contains tasks that should be completed by Usability test participants.

2 Tasks

The following tasks will test the usability of the Real-time FER web system.

2.1 Super User Simulation View

1. On the currently displayed page, investigate which users you currently have in the system.

2. Open a window to add a bot user to the system.

3. Set specific coordinates for the bot that you are willing to create.

4. Create that bot

5. Play simulation.

6. Switch to administration view

2.2 Super User Administration View

1. On the currently displayed page, open the edit window for the user with the name John Toe.

2. Change John Toe's email to "toe111@gmail.com".

3. Save changes.

4. Filter user table information in such a way so that the only type that will be displayed will be the "Bot" type.

5. Delete that only bot from the system.

6. Display all the user types again.

7. Open a window to add new user to the system.

8. Give that user name (no keyboard input is required)

9. Give that user email (no keyboard input is required)

10. Give that user password (no keyboard input is required)

11. Change user type to admin.

12. Send request to that user.

13. Open window to add new building to the system.

14. Give that building a name

15. Give that building location.

16. Upload image for building plan.

17. Upload file of the right type for building plan.

18. Save changes.
